## Faculty

Dr. Alisa Curry, PT, DPT, GTC, GCS, is a Board Certified Geriatric Clinical Specialist with primary focus in the rehabilitation of the total joint population. She holds her Doctorate of Physical Therapy from Arizona School of Health Sciences at A.T. Still University, a BS in Physical Therapy from Langston University in Langston, Oklahoma, a BS in Psychology from the University of California San Diego and holds a Geriatric Training Certification from Great Seminars. A Physical Therapist since 1994, she has treated over 10,000 patients with total joint arthroplasty in acute care, home health and skilled nursing. She also promotes increased networking and interprofessional collaboration at all levels of care. With the American Physical Therapy Association (APTA), she is currently working on evidence based models of care improvement for patients with total joint, has developed the Total Joint Replacement Special Interest Group for therapists practicing primarily with this patient population, moderates an online discussion listserv of over 2000 patients internationally, has presented for the APTA and the National Association of Orthopedic Nurses (NAON). Dr. Curry has also consulted on projects with the AAOS, NAON, APTA and other medical entities to improve care of the patient population.

## Description

How can we, as clinicians, practice in this rapidly changing environment and give great substantiated care? This course will give clinicians functional assessment tools and treatment focus to apply across the continuum of care. Surgical advances, treatment techniques and rehabilitation protocols will be presented for total hip, knee and shoulder arthroplasties. Protocols spanning from acute care to outpatient care will be covered, thus providing therapists with information to improve their clinical practice related to joint arthroplasty.

## Feedback From Past Course Participants

"Been a therapist for a long time, didn't think I would learn much ... I was wrong!"

"Alisa was so knowledgeable and personable, just full of information."

"I could tell that the speaker loves what she does."

"Great presentation by a dynamic personality!"

## Objectives

Upon completion of this seminar, participants will be able to:

- Adapt the latest treatment techniques for working with patients who have had a total joint replacement in any treatment setting.
- Analyze the latest surgical advances, considerations and technology in total joint arthroplasty.
- Judge post-operative precautions/restrictions following THA, TKA, TSA.
- Integrate functional evaluation tools.
- Analyze the aspects of total joint surgery for hips, knees and shoulders and the impact on rehabilitation.
- Propose rehabilitation programs for specific joint arthroplasty procedures.
- Formulate and review the rationale for rehabilitation protocols following total joint replacement.
- Recommend evidence-based treatment interventions for total joint replacement.
- Incorporate these principles into working with the interdisciplinary team in all stages of patient management.
- Discuss the reimbursement initiatives, the Comprehensive Care for Joint Replacement (CJR) model and impact of "Bundled Payment" on the various levels of care.
