**OBJECTIVES**

Upon completion of this seminar, participants will be able to:

1. Demonstrate the latest examination and intervention techniques for patients with stroke, Parkinson’s disease and gait and balance disorders.
2. Provide detailed explanations of current evidence-based techniques.
3. Prescribe a motivational program to enhance intervention outcomes for older patients with neurological conditions.
4. Differentiate between dementia and depression and provide meaningful intervention modifications for the challenges presented by these diagnoses.
5. Describe normal and pathological changes in the neurological system of an older person.
6. Recognize the different movement disorders commonly seen in older persons.
7. Thoroughly examine a patient with Parkinson’s disease, stroke, or gait and balance disorders utilizing several different functional assessment tools and design an effective intervention program.
8. Compare and contrast various methods of examining patients with stroke, Parkinson’s disease and gait and balance disorders for specific outcomes.
9. Organize and plan an effective rehabilitation program for geriatric patients with stroke, Parkinson’s disease and gait and balance disorders.
10. Identify fall risk factors, gait impairments and gait & balance deviations and develop specific approach to assess gait, balance and falls in the older patient using a variety of cutting-edge tools.
11. Create innovative screening and intervention programs for balance and gait deficits commonly seen in older persons.

**Feedback From Past Course Participants**

“Excellent course – very informative!”
“Dr. Lewis did an excellent job of keeping us engaged and interested.”
“This course made me motivated to use what I learned.”
“Wonderful, evidence based information!”
“Great course! Very interesting and entertaining!”
“Phenomenal course!”
“Dr. Lewis is very dynamic and easy to listen to… kept the weekend interesting!”
“This is a class that all therapists working with geriatric patients should be required to take.
“Great course… worth giving up my weekend for.”
“Excellent course, I was reading 2 days of sitting, but Carole made it very dynamic and fun!”
“Cutting edge information.”
“Dr. Lewis’ teaching style is fun and inspiring!”

**LOCATIONS**

The complete address and location of your course will be provided in a confirmation letter that will be emailed to you at least 3 weeks before the course.

- **Sierra Vista Regional Medical Center**
  - **Sharon Creek Drive**
  - **Akon, OH 44333-2311**
  - **Host:** OSU Physical Therapy Division
  - **Location:** The Ohio State University Columbus, OH
  - **Dates:** October 14-15, 2017

**FACULTY**

Dr. Lewis is well known as leader and innovator in the area of rehabilitation and optimal aging. She has served as the Editor-in-Chief of an award winning international journal for over 30 years and has received top honors from the American Physical Therapy Association and The Gerontological Society. She has worked in home health, long-term care, acute hospitals, rehabilitation departments and outpatient clinics. In 1993, she started a private practice in Washington, D.C. and continues to work as a clinician. Dr. Lewis received two Master’s degrees, Health Care Management and Gerontology, from the University of Southern California and a PhD in Health Education from the University of Maryland. She currently serves on the Medical Faculty at George Washington University as a full adjunct professor in the Department of Geriatrics.

**DESCRIPTION**

The purpose of this seminar is to provide participants with the most up-to-date information on neurological rehabilitation of the geriatric patient. The seminar format is lecture with demonstration that explores examination techniques, protocols and sample home exercises that can be provided in a confirmation letter that will be emailed to you at least 3 weeks before the course.

Upon completion of this seminar, participants will be able to:

1. Demonstrate the latest examination and intervention techniques for patients with stroke, Parkinson’s disease and gait and balance disorders.
2. Provide detailed explanations of current evidence-based techniques.
3. Prescribe a motivational program to enhance intervention outcomes for older patients with neurological conditions.

FACULTY

Dr. Lewis is well known as leader and innovator in the area of rehabilitation and optimal aging. She has served as the Editor-in-Chief of an award winning international journal for over 30 years and has received top honors from the American Physical Therapy Association and The Gerontological Society. She has worked in home health, long-term care, acute hospitals, rehabilitation departments and outpatient clinics. In 1983, she started a private practice in Washington, D.C. and continues to work as a clinician. Dr. Lewis received two Master’s degrees, Health Care Management and Gerontology from the University of Southern California and a PhD in Health Education from the University of Maryland. She currently serves on the Medical Faculty at George Washington University as a full adjunct professor in the Department of Geriatrics.

A prolific writer, Dr. Lewis has published in a variety of journals, including Journal of the American Physical Therapy Association, Clinical Management, Geriatrics, and Gerontics and Senior Patient. She is also editor of the journal Topics in Geriatric Rehabilitation which won the Association of American Publishers’ Award for the Most Outstanding Issue in a Scientific Journal. In addition, Dr. Lewis has authored numerous textbooks on aging including Physical Therapy for the Older Adult; Aging: Health Care’s Challenge: Interdisciplinary Assessment and Treatment of the Geriatric Patient, now in its fourth edition; Geriatric Clinical Strategies, Geriatric Physical Therapy; Orthopedic Assessment and Treatment of the Geriatric Patient; The Geriatric Exercises Kit; The Functional Toolbox II & III; The Balance Book; Osteoporosis Exercise Book; Prevention and Wellness Toolbox; the Orthopedic Outcome Toolbox; Health Promotion and Exercise for Older Adults; and Improving Mobility in Older Persons. She also co-authored a book for the lay public entitled Age-Defying Fitness published by Peachtree Publishers.

Her professional awards include the APTA’s Lucy Blair Service Award, the Section on Geriatrics’ Clinical Excellence Award and the Academy of Geriatric Physical Therapy’s highest honor, the Joan Mills Award. She is an APTA Catherine Worthington Fellow and in 2016, she received the Mary McMillan Lecture Award from the APTA, their highest honor. In addition, in 2014 she received the Gerontological Society of America’s Excellence in Rehabilitation of Aging Persons Award. Dr. Lewis has lectured in over 48 states. Her international lectures include Australia, New Zealand, Japan, Finland, Canada, China, Turkey, Egypt and Israel.

DESCRIPTION

The purpose of this seminar is to provide participants with the most up-to-date information on neurological rehabilitation of the geriatric patient. The seminar format is lecture with demonstration that explores examination tools and intervention protocols/designs and most appropriate for older patients with diagnoses of Parkinson’s Disease, stroke, gait and balance disorders. Information on the physiologic aging will also be presented as well as special features on the environment and burnout. The extensive handout, which is over 300 pages with 5,000 current medical references, will provide detailed examination forms, outcome measures, intervention techniques, protocols and sample home exercises that can be used immediately with patients.

PRESCRIBED MATERIALS

• Ready to use
• Over 6,000 current medical references
• Endorsement forms
• Effective Examination and Intervention Strategies
• Over 6,000 current medical references
• Endorsement forms
• Reliable and valid outcome measures

PROGRAM OUTLINE

Day 1

7:30AM Registration and Continental Breakfast
8:00AM Introduction: Working with the Older patient with Neurological abnormalities, The Rehabilitation Implications of Dementia, Depression and Motivation and Evidence Based Protocols
10:30AM Break
10:45AM The Neurology of Aging: Differentiating Pathological and Normal Aging • Neuropathies • Tremors Weakness • Movement Disorders • MRIs and Aging, Clinical Prediction Rule for Peripheral Neuropathy
12:30PM Working Lunch (Bring your own!) Perform Gait and Balance Tests
1:30PM Parkinson’s Disease – Evidence Based Examination and Intervention, Rhythmic Cues to Axial Mobility and many more
4:15PM Break
4:30PM Optimizing the Neurological Environment; Exploring Sensory Loss with Age, Special Feature on The Rehabilitation Specialist’s Role, Evidence Based Examination and Intervention
6:00PM Questions and Answers
6:30PM Adjourn

Day 2

7:30AM Continental Breakfast
8:00AM Stroke – Older Patients are Different: Examination Tools, Motor Assessment Scale to the Modified Sitting Balance Scale and many more
9:45AM Break
10:00AM Stroke: Creative Evidence Based Techniques, Mirror Therapy to Motor Relearning and many more
12:30PM Working Lunch (Bring your own)
Projective & Evidence Based Stroke Rehab Case Study
1:30PM Gait, Balance and Falls: A Functional Look at Neurological Problems – Evidence Based Examination and Intervention, FSST, Mini-Best and many more
4:30PM Break
4:45PM Burnout: How to Stay Vital When Working With Older Neurological Patients, Developing a plan for you and your co-workers
6:00PM Questions and Answers
6:30PM Adjourn
