Dr. Wendy K. Anemaet PT, PhD, GCS, CWS, GTC, COS-C, CWT

2018

Maplewood, MN (St. Paul, MN Area) May 19-20

West Orange, NJ September 15-16

Faculty

WENDY K. ANEMAET, PT, PhD, GCS, CWS, GTC, COS-C, CWT received her PhD in Aging Studies from the University of South Florida and her Master's degree in physical therapy from the University of Southern California. She has worked in a variety of settings and is also an assistant Professor at Regis University.

Wendy K. Anemaet is a geriatric specialist, certified weight trainer with extensive experience in resistance training program development, implementation, and modification. She is also certified for utilization review in Florida and lectures nationally on the topic of resistance training and geriatric rehabilitation. She has served as an issue editor for *Topics in Geriatric Rehabilitation* and as a monthly columnist for *ADVANCE for Physical Therapists*. She has authored several books including a practice-oriented text titled *The User Friendly Home Care Handbook* and the portable *Home Rehabilitation: Guide to Clinical Practice*. Combining her advanced theoretical knowledge base with practical field experience, she provides participants with optimal learning experiences.

Description

Resistance training is an integral component of therapeutic exercise. Put Some Muscle Into Ther Ex provides therapists with clinically challenging information on this often under utilized intervention for the geriatric population. Through dynamic lectures, audiovisuals, demonstrations, case applications, and a comprehensive handout, participants gain an updated understanding of the theory underlying resistance exercise, design and progression of training programs, and special considerations for resistance training in older patients. Interactive sessions offer the opportunity to learn and practice specific evaluation techniques including hand-held dynamometry and 1 RM strength testing for immediate implementation in the practice setting. Forums on specific resistance exercises allow therapists to perform, share and take home practical exercises for training the upper extremity, lower extremity, and trunk with a range of resistive exercise equipment. A synthesis of the precautions, contraindications, and program components provides participants with specific research based protocols for a myriad of diagnoses and functional limitations. Put Some Muscle Into Ther Ex provides a one-step update on resistance training that will jump start your patient outcomes.

Locations

The complete address and location of your course will be provided in a confirmation letter that will be emailed to you at least 3 weeks before the course.

Host: Fairview Rehabilitation Services Location: St. John's Hospital Maplewood, MN May 19-20, 2018

Kessler Institute for Rehabilitation West Orange Campus West Orange, NJ

September 15-16, 2018

Objectives

Upon completion of this seminar, participants will be able to:

- Identify common myths about geriatric resistance training
- List at least five benefits of resistance exercise for the older population
- Describe correct terminology for muscle physiology and the age-related changes impacting muscle function
- Be familiar with muscle assessment via the use of manual muscle testing, one repetition maximum, functional tests, and other objective measures
- Design, implement, evaluate, and modify effective resistance exercise programs to increase strength, power and muscle endurance confidently for the older population
- Determine when and how to advance resistance exercise programs
- Share creative resistance exercises for the upper extremity, lower extremity, and trunk
- Adapt evidence-based Ther Ex programs that utilize resistance training for patients with a variety of diagnoses and functional limitations

A&T Rehabilitation Books

The User Friendly Home Care Handbook

Provides home care therapists with the necessary information and tools to function effectively and efficiently in the home. It's user friendly format allows quick access to relevant materials such as home assessments, DME resource lists and functional tools. In addition, it includes patient education materials for a variety of topics ranging from precautions and DME education to tip sheets for various disorders and home exercises. Available at the course for \$99 or add \$10 shipping and handling.

DME Tool Kit

Stumped on just how you're supposed to educate patients in the use, care, maintenance and transport of DME like JCAHO requests? This reproducible book contains 2-sided instruction sheets for commonly-used DME. So you can teach, train and satisfy JCAHO in one easy step!

Tip Sheet:

Looking for education materials about diseases, disorders, and diagnoses seen commonly in rehabilitation? This reproducible book contains 2-sided education tip sheets on musculoskeletal, neurological, and general conditions for patient use.

Handy Handouts

Need a resource that provides a variety of patient handouts about specific precautions, compensatory techniques, and instructions used frequently in rehabilitation? From gait precautions and laminectomy precautions to energy conservation and scar massage, these handouts make patient teaching a breeze!

Pads with Pizzazz

This collection of rehabilitation 50 page pads streamlines your work!

The Schedule Pad - Give yourself a break with patient scheduling and at tax time with this organizational tool. \$5.00

The TKR Report Card - Patients love this double sided motivational tool with real life drawings demonstrating range of motion gains and other important milestones. \$10.00

 $\label{thm:construction} \textbf{The Standard Walker Instruction Sheet} - \textbf{Look} \ no \ further \ for \ an \ easy \ way \ to \ satisfy \ JCAHO \ when \ it \ comes \ to \ DME \ patient instruction. This double \ sided \ pad \ does \ it \ all. \ \10.00

The One Repetition Maximum Pad - You know it is the best way to strengthen patients, but you hate the math. This pad does it for you and keeps track of exercises and patient progress. Give it a try. \$5.00

The SAFE AT HOME - Home assessments are a breeze with this comprehensive double-sided home evaluation form. Check box format makes it quick and allows ample room for narrative comment. \$10.00

For purchase of books and pads by mail, send check or money order to: A&T Rehabilitation Solutions, 2850 Bullard Drive, Clearwater, FL 33762

Feedback from Past Course Participants

"Thank you so much for such a great class! This course was exactly what I have been looking for for years. An objective and evidence based way to prescribe and measure strength that is usable in a small outpatient clinic."

Program Outline

7:30AM Registration and Continental Breakfast 8:00AM Introduction The Role of Mother Nature and Father Time

Current concepts in muscle physiology

10:30AM Break

10:45AM Taking Stock: Muscle Strength, Power, and Endurance

Age-related changes impacting muscle performance

- What muscle function do you lose over time and why? Find out here! Measuring Up: Evaluating muscle performance
- Did you know MMT is not very reliable? Come learn why and what to do about it.

Target Practice: Function oriented goals for muscle performance

• Ever set a goal to increase muscle power? You will on Monday!

12:30PM Lunch (Working Lunch (on your own) - Case Studies/Group Discussion)

1:30PM Taking Stock: Muscle Power

Taking Stock: Muscle Endurance

Getting Beyond "Take 10 Quad Sets and Call Me in the Morning."

Resistance Exercise Prescriptions ACSM Principles, Parameters, and Modes

 How long of a piece of yellow resistance band do you use for weak internal rotators? Did you know there's only one answer?

3:45PM Break

4:00PM Getting Beyond "Take 10 Quad Sets and Call Me in the Morning." (cont'd)

6:00PM Questions and Answers

6:30PM Adjourn

DAY 2

7:00AM Continental Breakfast

7:30AM Change is Good: Advancing the Resistance Training Program Putting ACSM guidelines to work in practice

• How do you put muscle into Ther Ex? Follow our plan.

What's Up?! Creative Resistance Exercises

Diverse exercises for improving upper extremity, lower extremity, and trunk muscle performance

 Wonder what muscles need to get strong to improve bed rise? We cover that!

10:30AM Break

10:45AM Get in Gear: Diagnosis Driven Resistance Training

Considerations and research based practices for resistance training for a variety of medical diagnoses

• Have you avoided resistance training with CVA patients because it may worsen tone? Learn the truth about this and other protocols for rehabilitation.

12:30PM Lunch (Working Lunch (on your own) - Case Studies/Group Discussion)

1:30PM Get in Gear: Function Driven Resistance Training

Considerations and research based practice for resistance training for specific functional limitations and therapy diagnoses

• Is poor leg power and strength keeping your patient in the chair? Train them to stand up fast with our plan!

3:45PM Break

4:00PM Get in Gear: Function Driven Resistance Training (cont'd)

5:30PM Questions, Answers and Conclusions

6:00PM Adjourn
