Objectives
Upon completion of this seminar, participants will be able to:

- Explain the federal regulations pertaining to medications and scope of practice.
- Define pharmacodynamics, pharmacokinetics, polypharmacy, medication errors, and adverse drug events.
- Evaluate older adults experiencing polypharmacy and identify medication effects impacting function.
- Demonstrate use of the Beers List to identify potentially inappropriate drug use in the older population.
- List the commonly prescribed medications (prescription and OTC), their indications and side effects.
- Explain medication adherence and how it relates to adverse drug events and health outcomes.
- Identify adverse drug reactions, side effects, and intended effects of the medications older adults take.
- List the steps involved in and perform a hands on medication review and reconciliation process.
- Differentiate positive and negative medication effects on physical functioning, pain, endurance, strength, anxiety, depression, balance and risk for falling.

Feedback From Past Course Participants
"Very informative, the speaker was very good with explaining details and making pharmacology easy to understand. Good handouts and videos."

"Great Presenter. Very upbeat and knowledgeable, thank you for making me feel more confident with medication reviews."

"This was an excellent and useful course."

"I thought the course material built up in a logical way that was not overwhelming. Very well organized; the handout was very readable."

"Presenter is a great motivational speaker with examples from his current practice and experience."

Locations
The complete address and location of your course will be provided in a confirmation letter that will be emailed to you at least 3 weeks before the course.
