Description

Orthopedics is a branch of rehabilitation that covers an incredible array of diagnosis. From acute to chronic injuries and post-surgical management, today's rehab professional needs to be able to understand the broad range of patients they will see in their professional setting. This course is designed to provide the relevant clinical skills to enable the practitioner to effectively manage the orthopedic rehabilitation patient in a range of clinical settings. This course will increase your clinical knowledge and skills to effectively treat your orthopedic patients. The course instructor has extensive academic and clinical training in orthopedic manual therapy, and has instructed courses in orthopedics nationally. His ability as an instructor to make complex concepts accessible has received positive accolades from course attendees nationwide. You will leave this course with new tools for patient management that you will be able to implement immediately.

Faculty

Dr. Paul Frizelle PT, DPT, MS, OCS, MTC, CSCS, PES, CES received his Bachelors of Science in Sports Management from the University of Tampa, Master's Degree in Human Movement from AT Still University, and his doctorate from the University of St. Augustine. His training in orthopedic physical therapy is extensive and includes completing his orthopedic manual therapy residency. Dr. Frizelle has focused his area of practice in orthopedics for national and regionally based outpatient physical therapy companies as well as the rehabilitation hospital setting. He is an adjunct faculty member for AT Still University in their master's degree Kinesiology program. He has instructed courses including Functional Anatomy, Human Movement Dysfunction, and Post Rehabilitation Exercise. Dr. Frizelle is a nationally recognized speaker in orthopedics and has instructed courses in joint arthroplasty, management of the lumbopelvic hip complex, and evaluation and treatment of the lower extremity. His professional interests include exercise programming in the orthopedic management process, and the application of manual therapy in orthopedic rehabilitation.

Objectives
