Janene Barber
PT, GTCCS, FSOAE

Do you feel at times that you have designed and delivered the best gait and balance program and yet your patients still have some problems with their balance?

THIS COURSE IS FOR YOU!

Here’s what our course attendees say:

“This course was fantastic! Fun, helpful, thorough. Janene knows her stuff. I will use this info tomorrow at work. This elevates us as clinicians.”

“Ms. Barber was the best instructor I have had in all of my CEU classes.”

“Janene Barber is simply awesome!”

“Great, dynamic speaker.”

“Janene was great. Made the information easy to understand.”

Quote from Dr. Carole Lewis

“I have had the distinct pleasure of watching Ms. Barber work and she is a master clinician and outstanding lecturer. There is not a dull or empty moment when she is discussing and demonstrating her favorite topic of balance impairments.”

Taking Balance to the Limits

Compared to other on-site courses, GREAT Seminars courses are the best value in the business. Most live courses are only 6 hours and cost $229-$295 which is $40-$50 per credit. A 20-hour course like this would cost $800-$1000! Get 20 CEUs for $545 out $1000! Plus if you register early, it’s just $495!

Taking Balance to the Limits

Do you feel at times that you have designed and delivered the best gait and balance program and yet your patients still have some problems with their balance? This course goes beyond all you have learned about the effects of speed, strength and range of motion limitations as causes for balance dysfunction. You will leave with an in-depth knowledge and skill in the postural dyscontrol, somatosensation and vestibular arenas. Janene Barber has taught and treated extensively in this area with astounding results with her patients and clinicians. Her skills in this area are unparalleled. Take home innovative usable evaluation and treatment techniques that will dramatically change your practice. You and your patients deserve to receive this cutting-edge information.

GREAT Courses for GREAT Outcomes

“where therapists learn and excel in the care of the ever-increasing older adult population”

2020

Raleigh, NC August 15-16

Laguna Hills, CA October 3-4

Shreveport, LA October 10-11
JANENE BARBER, PT, GTCCS, FSOAE, received her BS from the University of Missouri. Since 1997, she has been specializing in the care and rehabilitation of the geriatric patient in various settings. Ms. Barber was President/owner of Occupational Wellness and St. Charles Physical Therapy Center in Louisiana. In these settings, she was involved in the rehabilitation of patients with compromised balance. She was also an adjunct faculty at LSU—LA Mobile. In 2003, Ms. Barber joined Gentiva Health Services as Program Director for Gentiva Safe Strides, an extensive and comprehensive balance program. Ms. Barber was responsible for training, development and outcomes with the program. In 2004, she was promoted to Clinical Program Specialist and involved in the development and implementation of Safe Strides nationally. In 2006, Ms. Barber moved into a consulting role with Optimum Balance to continue development and implementation of programs to accommodate the increasing need to reduce the risk of falls in the senior population.

OBJECTIVES

Upon completion of this seminar, participants will be able to:

1. Analyze the impact of falls on the senior population and identify the primary causes.
2. Recognize the peripheral and central vestibular system function and anatomical structures.
3. Thoroughly evaluate the Vestibulo/Ocular system and how it affects elderly with balance dysfunctions.
4. Identify causes of central and peripheral dizziness, recognize the different mechanisms of recovery and how to impact them with therapeutic intervention.
5. Perform treatment interventions based on an understanding of BPPV (Benign Paroxysmal Positional Vertigo) for the geriatric population.
6. Demonstrate a comprehensive evaluation and treatment approach for positional control by understanding sensory and motor integration.
7. Create innovative treatment strategies that will effectively address positional control issues in the geriatric patient.
8. Compare functional tools for gait and balance disorders to achieve the desired outcomes.
9. Perform evaluations on patients with compromised somatosensory system and apply appropriate treatment strategies with Answeric Therapy and sensory integration training.
10. Plan an effective rehabilitation program, set measurable goals and use appropriate documentation for patients with balance impairments.

LOCATIONS

Additional course information will be provided in a confirmation letter that will be emailed to you at least 3 weeks before the start of the course.

1. Plan an effective rehabilitation program, compromised somatosensory systems and apply disorders to achieve the desired outcomes.

2. Compare functional tools for gait and balance effectively address postural control issues in the Positional Vertigo) for the geriatric population.

3. Thoroughly evaluate the Vestibulo/Ocular therapeutic intervention of recovery and how to impact them with dizziness, recognize the different mechanisms

4. Perform treatment interventions based on how to accommodate the increasing need to reduce the risk of falls in the senior population.

5. Conduct a thorough evaluation of the Vestibulo/Ocular System and how it affects elderly with balance dysfunctions.

6. Identify causes of peripheral and central vestibular dysfunction, somatosensory dysfunctions, and how to evaluate patients with balance impairments.

7. Review the indications and contraindications for physical therapy in the treatment of balance impairments.

8. Discuss the role of the physical therapist in the rehabilitation of patients with balance impairments.

9. Discuss the assessment and treatment of balance impairments in various settings.

LOCATIONS

Additional course information will be provided in a confirmation letter that will be emailed to you at least 3 weeks prior to the start of the course.

Day 1

8:00-8:45  Introduction: Impact of Balance Impairments on the Elderly Population and Identifying the Major Factors

8:45-10:15  Anatomy of the Peripheral and Central Vestibular System

10:15-10:30  Break

10:30-12:30  Screening of the Vestibulo/Ocular System

2:45-3:45  Lab for Functional Tools

3:00-4:30  BPPV (Benign Paroxysmal Positional Vertigo) for the Elderly

3:45-4:45  Common Causes of Peripheral and Central Vestibular System Dysfunction

4:30-4:45  BPPV Lab

4:45-6:00  Common Causes of Peripheral and Central Vestibular System Dysfunction

6:00-6:30  Questions and Answers

Day 2

7:30-8:00  Continental Breakfast

8:00-8:30  Testing of Oculomotor/BPPV

8:30-10:30  Vestibular Treatment Strategies

10:15-10:45  Break

10:45-11:45  Organization of Vestibular Central System Three Sensory Systems Motor Components

11:45-12:30  Understanding Central Processing and Its Disorders

12:30-1:30  Working Lunch on your own Case Studies, Group Discussion

1:30-2:00  BPPV Benign Paroxysmal Positional Vertigo

2:00-3:00  How to Evaluate Treatment Techniques

3:00-4:30  BPPV Case

4:30-4:45  Learn Alternative Treatment Positions Designed for the Elderly

4:45-6:00  Common Causes of Peripheral and Central Vestibular System Dysfunction

6:00-6:30  Questions and Answers

Audiologic Therapies

Additional course information will be provided in a confirmation letter that will be emailed to you at least 3 weeks prior to the start of the course.
