Total Joint Arthroplasty:

The Newest Information on Outcomes and Rehabilitation Across the Continuum

2021

**Watch for
2021 Courses
Coming Soon**

The environment of total joint arthroplasty is changing. As rehab professionals, therapists are no longer relegated to silos of care. The therapists in home health, skilled nursing and outpatients must evaluate and treat what is considered an acute care level patient due to the minimal length of stay. Patients in the acute setting are functionally performing at the home health and outpatient levels. This course addresses how we meet this growing population to provide time appropriate treatment interventions across the continuum of care. Therapists must quickly and accurately identify problems, develop relevant rehab plans and modify their care to fit everyone from the fit to the frail elective surgery patient. This course examines all of the factors impacting rehabilitation and successful recovery.

FACULTY

Dr. Alisa Curry, PT, DPT, GTCCS, GCS, FSOAE is a Board Certified Geriatric Clinical Specialist with primary focus in the rehabilitation of the total joint population. She holds her Doctorate of Physical Therapy from Arizona School of Health Sciences at A.T. Still University, a BS in Physical Therapy from Langston University in Langston, Oklahoma, a BS in Psychology from the University of California San Diego. Alisa is also a Geriatric Trained & Certified Clinical Specialist (GTCCS). A Physical Therapist since 1994, she has treated over 10,000 patients with total joint arthroplasty in acute care, home health and skilled nursing. She also promotes increased networking and interprofessional collaboration at all levels of care. With the American Physical Therapy Association (APTA), she is currently working on evidence based models of care improvement for patients with total joint, has developed the Total Joint Replacement Special Interest Group for therapists practicing primarily with this patient population, moderates an online discussion listserve of over 2000 patients internationally, has presented for the APTA and the National Association of Orthopedic Nurses (NAON). Dr. Curry has also consulted on projects with the AAOS, NAON, APTA and other medical entities to improve care of the patient population.

6:00	Questions and Answers
6:30	Adjourn

OBJECTIVES

Upon completion of this seminar, participants will be able to:

- Analyze the latest surgical advances, considerations and technology in total joint arthroplasty.
- Judge post-operative precautions/restrictions following THA, TKA, TSA.
- Integrate functional evaluation tools.
- Examine the areas of pain management, wound healing and comorbidities impacting recovery across the care continuum.
- Analyze the aspects of total joint surgery for hips, knees and shoulders and the impact on rehabilitation.
- Propose rehabilitation programs for specific joint arthroplasty procedures.
- Formulate and review the rationale for rehabilitation protocols following total joint replacement.
- Recommend evidence-based treatment interventions for total joint replacement.
- Incorporate these principles into working with the interdisciplinary team in all stages of patient management.
- Discuss the Comprehensive Care for Joint Replacement (CJR) model and impact of "Bundled Payment" on the various levels of care.

LOCATIONS

Additional course information will be provided in a confirmation letter that will be emailed to you at least 3 weeks before the start of the course.
